

LAKE COUNTY/CITY AREA PLANNING COUNCIL

Lisa Davey-Bates, Executive Director
www.lakeapc.org

367 North State Street, Ukiah, CA 95482
Administration: Suite 204 ~ 707-234-3314
Planning: Suite 206 ~ 707-263-7799

TECHNICAL ADVISORY COMMITTEE (TAC) MEETING AGENDA

DATE: Thursday, February 20, 2020
TIME: 9 a.m.
PLACE: City of Lakeport
Large Conference Room
225 Park Street
Lakeport, California

Caltrans-District 1
Teleconference
1656 Union Street
Eureka, California

Teleconference Dial-In #: 866-576-7975 Passcode: 961240

1. Call to order
2. Approval of January 16, 2019 Minutes
3. Discussion of 2020/21 Overall Work Program Project Requests (*Pedrotti*)
4. Discussion and Recommended Approval of the Countywide Sign Inventory (*Speka*)
5. Announcements and Reports
 - a. Lake APC
 - i. Update on Sustainable Transportation Planning Grants (*Speka*)
 - ii. Update on Strategic Partnerships Grant (*Casey*)
 - iii. Update on Unincorporated County Transportation Tax Polling (*Casey*)
 - iv. Housing Planning and Infrastructure Grants (*Barrett*)
 - v. Miscellaneous
 - b. Lake Transit Authority
 - i. Miscellaneous
 - c. Federal & State Grant Status Reports
 - i. Transit and Intercity Rail Capital Program (TIRCP)(*Speka*)
 - ii. Other Grant Updates (*All*)
 - d. Caltrans
 - i. Lake County Projects Update
 - ii. Other Updates
6. Information Packet
 - a. League of Cities Estimated HUTA Revenues
7. Public input on any item under the jurisdiction of this agency, but which is not otherwise on the above agenda
8. Next Proposed Meeting – **March 19, 2020**
9. Adjourn meeting

Public Expression - The TAC welcomes participation in TAC meetings. Comments will be limited for items not on the

agenda to three minutes per person, and not more than 10 minutes per subject, so that everyone may be heard. This time is limited to matters under TAC jurisdiction which have not already been considered by the TAC.

Americans with Disabilities Act (ADA) Requests - To request disability-related modifications or accommodations for accessible locations or meeting materials in alternative formats (*as allowed under Section 12132 of the ADA*) please contact the Lake APC office at 707-263-7799 at least 72 hours prior to the meeting.

TECHNICAL ADVISORY COMMITTEE MEETING

Draft Meeting Minutes

Thursday, January 16, 2020

9 a.m.

City of Lakeport

Large Conference Room

225 Park Street

Lakeport, California

Present

Doug Grider, City of Lakeport

Kevin Ingram, City of Lakeport

Mark Roberts, County of Lake

Dale Goodman, City of Clearlake

Saskia Rymer, Caltrans District 1 (by telephone)

Absent

Joel Skeen, California Highway Patrol

Scott DeLeon, County of Lake

James Sookne, Lake Transit Authority

Dave Swartz, City of Clearlake (Planning Consultant)

Also Present

Nephele Barrett, Lake Area Planning Council

Alexis Pedrotti, Lake Area Planning Council

Danielle Casey, Lake Area Planning Council

Mark Mueller, Caltrans District 1 (by telephone)

1. Call to order

The meeting was called to order at 9:06 a.m.

2. Approval of October 17, 2019 Lake APC TAC Minutes

Motion by Kevin Ingram, seconded by Doug Grider, and carried unanimously to approve the October 17, 2019 minutes as written.

The group agreed to take the next several agenda items out of order.

5. Progress Status Report on FY 2019/20 Overall Work Program Projects

Alexis Pedrotti explained the purpose of the status report. Agencies have been notified of their funding balances in each project. Lakeport doesn't have any current projects. Clearlake has a higher balance than is typical in the OWP, which has not had any expenditures. Alexis reviewed the amounts, sources, and deadlines associated with the

funds. APC Planning is just over 50% expended. The agency is now fully staffed and administering a high number of grant projects. The group discussed progress on some of the grants. Alexis explained that Clearlake had previously indicated that they would pay for the database for the sign inventory, but that may no longer be the case following staff changes.

APC staff discussed the reasons for higher rates of expenditures. In response to Doug Grider, staff explained that the agency has a reserve, but it's not specific to the OWP. Alexis noted that there may be a need in the future to utilize additional funding to pay for the speed zone studies. TAC members indicated that they are in favor of continuing to utilize Phil Dow for the studies if possible.

6. Discussion and Recommended Approval of the Third Amendment of the 2019/20 Overall Work Program

Alexis reviewed the proposed third amendment, which addresses three issues. The City of Lakeport requested an additional \$5,000 for Work Element (WE) 607 to fund project development efforts to prepare for their Main Street and Lakeport Boulevard Roundabout project.

Alexis explained that the training work element did not previously have direct expenses identified. This amendment will add \$5,000 for direct expenses associated with staff training.

These first two items will require a reduction in the existing project reserve of \$10,000 in LTF.

Finally, the amendment will shift funding for APC staff time from WE 605 (Grant Preparation & Monitoring) and WE 607 (Special Studies) to Work Element 602 (Transit Planning) and 608 (Planning, Programming & Monitoring), elements that have experienced higher use. The amendment will not result in an overall increase for APC staff.

Kevin provided additional details on Lakeport's roundabout project and the need for the additional funding.

Motion by Kevin Ingram, seconded by Doug Grider, and carried unanimously to recommended approval of the Third Amendment to the FY 19/20 Overall Work Program.

7. Discussion of FY 2020/21 Overall Work Program Project Requests

Alexis explained that the APC is now accepting applications for funding in the next OWP. She reviewed the funding available for agency projects and activities, as well as past uses.

Kevin Ingram mentioned that the pedestrian facilities study has been completed, and agencies should consider OWP funding for time and additional work needed to prepare an Active Transportation Program grant. Alexis explained that the Grant Preparation and Monitoring Work Element would be appropriate for those activities.

Alexis reminded agency staff that if they receive funding in the OWP, they will need to

provide quarterly reports and utilize the funding.

Requests are due January 31. The draft will be prepared for TAC review in February.

Alexis mentioned that the PMP update will be needed next year, but there may be a need to start reserving funding now. Nephele Barrett commented that agencies may want to consider adding to the PMP update to include a photo record of road conditions.

Alexis left the meeting at 9:42.

4. Highway Improvement Program Funds (HSIP) Local Safety Plans

Danielle Casey noted that the Local Road Safety Plans (LRSP) will be a requirement for future HSIP application cycles. The HSIP hasn't been highly utilized, but agencies are interested in continuing eligibility.

The group discussed the need for safety data to qualify for the program. Mark Mueller mentioned that in the absence of collision data, agencies may be able to improve applications with public outreach. They can also apply for specific activities that don't require the safety index.

Mark explained that Lake County has been awarded funding to prepare an LRSP and had indicated they could include the cities plans in their contract. Cities would need to apply for their own funding, then enter into an MOU with the County. Danielle explained that the applications are available now and should be completed right away, as the funding is first come first served. The APC may also be able to administer a contract for the plans through their OWP.

Representatives from the cities expressed interest in developing the plans now as part of a contract administered by the APC or the County. They will seek funding. APC staff will email the application to TAC members.

Dale Goodman left the meeting at 9:52 a.m.

3. Discussion of Highway Infrastructure Program Funds

Nephele explained that the TAC previously recommended that the Highway Infrastructure Program (HIP) funds be awarded to the County for their South Main Street and Soda Bay Road projects. The reasons for this decision were reviewed, including the requirements associated with the federal funding. At the time of the previous action, there was question as to whether the County could meet the deadlines for authorization. Staff explained that County Public Works Director, Scott DeLeon, has indicated that they can. The matter will now move on to the APC for action.

8. Discussion on Updated Local Partnership Program (LPP) Guidelines

Nephele reviewed the purpose of the Local Partnership Program, which provides funding to agencies that have transportation sales tax measures. An update of the guidelines is currently underway. Highlights of the California Transportation Commission staff's

recommendations include an increase of the funding minimum to \$200,000 annually and the addition of system preservation to the selection criteria. Currently, Clearlake is the only agency in Lake County that is eligible for these funds.

9. Announcements and Reports

a. Lake APC

i. RTIP Submittal

Danielle gave a summary of the RTIP submittal and next steps in the STIP adoption process. The northern STIP hearing is scheduled for January 30.

ii. Update on Unincorporated County Transportation Tax Polling

Nephele provided an update on the project. FM3 has been selected to conduct the polling. A kickoff meeting was held last week in which aspects of the potential tax were discussed along with questions to include in the survey. The consultants will provide a draft before the next project meeting on January 23. It is anticipated that results will be presented to the Board of Supervisors in March. The group discussed the County's previous attempts at sales tax measures.

iii. AB 101 Housing Planning and Infrastructure Grants

Nephele listed the three grant programs created by AB 101, the budget trailer bill—the Infill Infrastructure Grants (IIG), Local Early Action Planning (LEAP) Grants, and Regional Early Action Planning (REAP) Grants.

Danielle provided information on IIG. The group discussed potential projects that would qualify. APC staff is researching the program and will provide additional information. Applications are due February 18. Danielle explained that for small jurisdictions the program is over the counter, although the application looks complex. Agencies must have a compliant Housing Element to qualify.

Nephele reviewed the LEAP grant program, which will be available to local agencies soon. The program will be similar to SB 2 and is intended to fund planning to support housing creation and implementation of Cycle 6 RHNA. Funding is based on population. Lakeport and Clearlake would be eligible for \$65,000 each and the County for \$150,000. It is unknown if a current Housing Element is required.

Nephele explained that the REAP program will be similar to LEAP, but funding will come directly to the APC. This program is a year behind the REAP program. Although the APC has RHNA responsibility, they don't typically take on other land use/housing related responsibilities. APC staff will be assessing the feasibility of this program. The matter will be further discussed at a later TAC meeting.

iv. Miscellaneous

There were no miscellaneous items discussed.

b. Lake Transit Authority

i. Miscellaneous

Nephele noted that LTA staff is working extensively on an application for Transit & Intercity Rail Capital Program (TIRCP) grant.

c. Federal & State Grant Status Reports

i. Sustainable Transportation Planning Grant Update

Danielle provided an update on the SR 53 Local Circulation Study grant project. The consulting firm TJKM has been secured for the project and a kickoff meeting was held January 8.

ii. Other Grant Updates

No other grants were discussed.

d. Caltrans

i. Lake County Projects Update

Saskia Rymer-Burnett noted that she has been reviewing Requests for Reimbursement.

Nephele commented that the Caltrans District 1 project status interactive map is nearing completion. It provides information on current, future, and past construction projects as well as planning projects in the area. This will be a useful tool. Saskia mentioned that she could provide contact information for the person developing the map if TAC members have questions.

ii. Other Updates

No other updates were provided.

10. **Information Packet** – The 2020 Lake TAC Meeting Schedule was provided by email, but will be re-sent for those that may not have received it.
11. **Public input on any item under the jurisdiction of this agency, but which is not otherwise on the above agenda** - None
12. **Next Proposed Meeting** – February 20, 2020
13. **Adjourn Meeting** - Meeting adjourned at 10:28 a.m.

Respectfully Submitted,

Nephele Barrett
Lake APC Planning

LAKE COUNTY/CITY AREA PLANNING COUNCIL TAC STAFF REPORT

TITLE: 2020/21 Overall Work Program Development

DATE PREPARED: 2/13/20

MEETING DATE: 2/20/20

SUBMITTED BY: Lisa Davey-Bates, Executive Director

BACKGROUND:

The first week of January 2020 you should have received a memorandum informing you of the available funding levels and timelines proposed for the development of the 2020/21 Overall Work Program. In that memo, I requested project applications be submitted to Lake APC staff by January 31, 2020.

A spreadsheet is attached to this staff report as an initial list of potential work elements to be considered for 2020/21 Work Program. Staff developed this list based on applications received and the previous discussions with Lake TAC members.

In Fiscal Year 2020/21, Local Transportation Funds (LTF) and Rural Planning Assistance (RPA) funding remain consistent, while Planning, Programming and Monitoring (PPM) has increased by \$11,000 to \$46,000. Total funds in the amount of \$390,000 are anticipated for next fiscal year. Lake APC is obligated to fulfill funding for the planning contract (plus adjustments for CPI increases) in the amount of \$293,881 prior to programming funds for other uses. The initial summary of requests for all projects total \$364,000, which is \$34,190 under the available funding for this year's OWP.

The project list will be updated based on the outcome of the discussion during the February 20th Lake TAC meeting. Preferred projects that are recommended at the TAC meeting will be included in the Draft Work Program which is due to Caltrans March 1st. Because of the short time frame, and the fact that there will be few new projects to discuss, the draft document will be submitted to Caltrans prior to the next Lake TAC meeting. Lake APC staff will email the draft 2020/21 OWP to the Lake TAC for comments prior to submitting the document to Caltrans staff.

Lake TAC or APC action is not needed on the draft document, but will be required on the Final Work Program which must be adopted by the Lake APC Board of Directors and submitted to Caltrans in May.

ACTION REQUIRED: Discuss proposed work elements and provide input on development of Draft 2020/21 OWP.

ALTERNATIVES: None.

RECOMMENDATION: Provide input on development of Draft 2020/21 OWP.

LAKE COUNTY 2020/21 WORK PROGRAM SUMMARY OF REQUESTS BY WORK ELEMENT

Dow & Associates Contracted Amount + CPI increase= **\$293,881**

(additional funds have been allocated to the APC Staff Consultant to cover the Speed Zone Studies – Work Element 606 performed by a sub-consultant, Phillip Dow under APC Planning Staff)

LAKE COUNTY/CITY AREA PLANNING COUNCIL TAC STAFF REPORT

TITLE: Discussion and Potential Recommendation of Approval for the Countywide Sign Inventory **DATE PREPARED:** 2/9/2020
MEETING DATE: 2/20/2020

SUBMITTED BY: John Speka, Senior Transportation Planner

BACKGROUND: The Countywide Sign Inventory Project was started at the end of 2018. Data was collected and recorded over the first nine to ten months of 2019 cataloging the number of signs within each of the region's jurisdictions, along with sign conditions, locations and other relevant factors. The project is now nearing its completion with a draft report completed in November 2019, detailing the inventories of both cities and the County. Copies were emailed to each of the three public works agencies for review at that time.

Recommendations, as well as evaluations of sign conditions and cost estimates, were included as part of the study. Attached is a copy of the draft Countywide Sign Inventory Report with Lakeport signs covered on pages 9 - 15, Clearlake on pages 16 – 23 and the County on pages 24 – 33. At this point, staff is requesting a recommendation from the TAC to the APC Board, which would approve the study.

Once the report is accepted, the final step will involve coordination between the consultant and the individual agencies to integrate the new GIS data with their existing systems. Staff is in the process of connecting the consultant with the appropriate contacts to complete the project.

ACTION REQUIRED: Recommendation to the APC Board approving the Countywide Sign Inventory Plan

ALTERNATIVES: Request revisions to the Plan and evaluate at a later meeting

RECOMMENDATION: That the TAC recommend to the Lake APC Board approval of the Countywide Sign Inventory Plan

- Appendix B – City of Clearlake Sign and Post Replacement Details
- Appendix C – Unincorporated Lake County Sign and Post Replacement Details

1.0 Introduction

1.1 Introduction and Overview

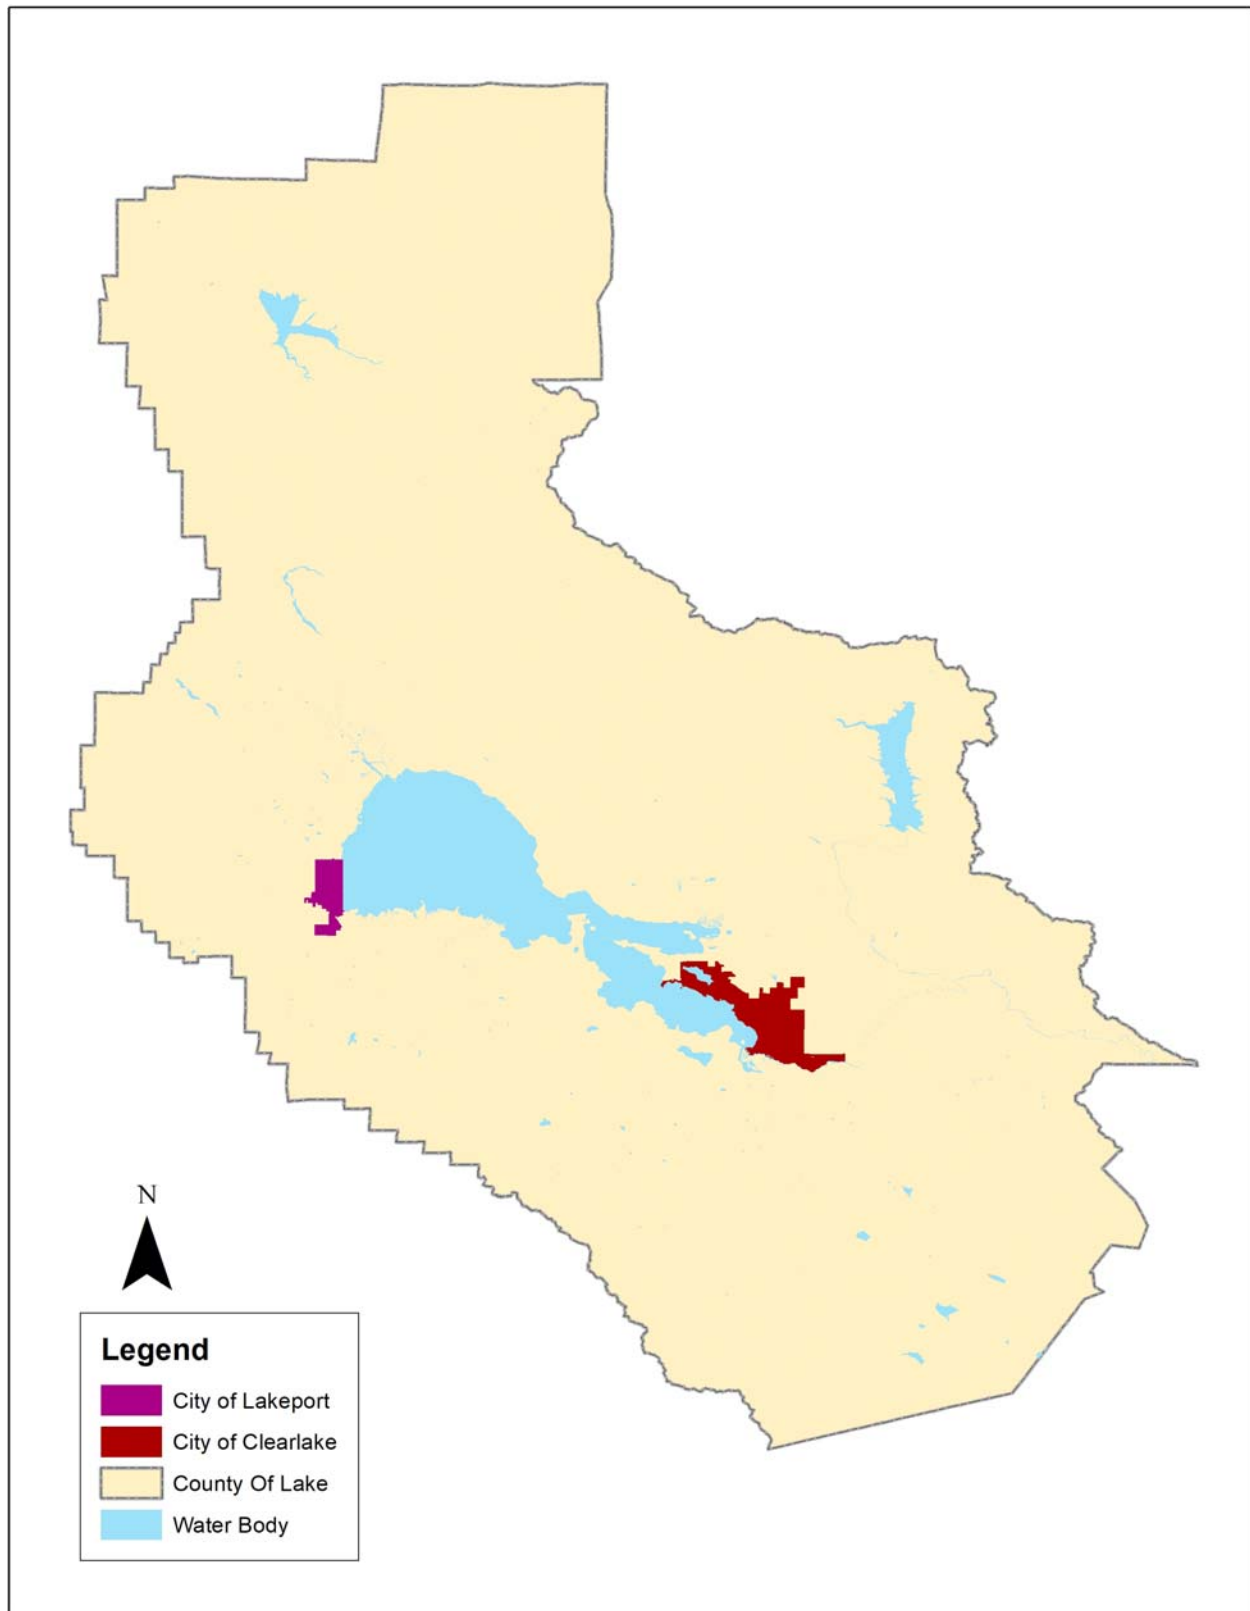

The Countywide Sign Inventory Plan is a project of the Lake Area Planning Council (APC) to inventory and review the retroreflective standards of all signs in the City of Clearlake, City of Lakeport, and unincorporated Lake County. TJKM created a comprehensive inventory and evaluated each sign for retroreflectivity standard, sign condition and post condition. The retroreflectivity standards of each sign were reviewed for conformance to the California Manual for Uniform Traffic Control Devices (CMUTCD). This report provides a listing of signs needing replacement due to failed retroreflective standards and poor condition, and also provides a listing of posts that need to be replaced. The signs and sign posts surveyed also included signs which do not have required retroreflective standards such as parking signs. This report provides a list of signs and sign posts falling in this category and recommends considering them for future replacement.

The project area encompasses the entire city limits of the City of Lakeport, the City of Clearlake, and the unincorporated areas of Lake County. Data were collected separately for each of the three project areas mentioned. A map of the area covered under the Sign Inventory Plan is shown in **Figure 1**. A total of 10,404 signs were surveyed in all three project areas. These signs were inclusive of regulatory, warning, guide and city/county specific signs. It is to be noted that regulatory signs listed in this report are inclusive of parking signs, whereas guide signs are inclusive of transit signs and street name signs. These signs surveyed are listed as follows-

- Signs that failed retroreflectivity test.
- Signs that have passed retroreflectivity test but are damaged, vandalized or faded.
- Signs that do not have retroreflectivity requirements but are damaged, vandalized or faded, and are recommended for future sign replacement project.
- Sign posts that "needs replacement". Sign posts that are bent, loosely grounded or corroded are classified as posts needing replacement.

Listings of signs categorized in such manner were made available to the Lake APC and the three agencies in the form of GIS layers using ArcMap. This software, with its geospatial abilities allows the mapping of signs and sign posts on a map for easy location and attribute look up.

Above picture depicts a sign which passed Retroreflectivity test but is damaged

Above picture depicts a sign post which is damaged and needs replacement

2.0 Traffic Sign Inventory

2.1 Traffic Sign Inventory

National Data and Surveying Services (NDS) collected a complete inventory of all signs within the City of Lakeport, City of Clearlake, and unincorporated Lake County. The following is a list of attributes that have been collected.

Features and attributes of traffic signs:

1. Unique ID – Every device is assigned a unique identification number.
2. GPS (Latitude/Longitude) – NDS delivered sub-meter results and, in most cases, sub-foot results.
NDS used the projection consistent with existing agency GIS data.
3. Sign Type – Stop Sign, Speed Limit Sign, Parking Sign, School, Curve Warning, Guide Sign, Street Name Sign, Other Regulatory, Other Warning, Mile Post Marker, Non-Standard. The specific code, be it CAMUTCD or agency specific, was used.
4. Road Name
5. Nearest Postal Address
6. Height of Sign from Ground – Addresses liability concerns.
7. Sign Dimensions – Height and width of sign. NDS uses a five-piece telescopic aluminum leveling rod that is made of a light and durable alloy for data collection in these sign inventory studies. The rod is used for all sign measurements and included within the picture to create a sense of scale when looking at the pictures later. This enables NDS to do an additional layer of Quality Control (QC), i.e. to check the measurements later and verify the field personnel. This also gives the agency a sense of size in the years to come.
8. Sign Direction – Direction the sign is facing.
9. Position of Sign – Roadside, median, or overhead.
10. Condition of Sign – Good, vandalized, faded, damaged. etc.
11. Date of Installation (if available) – Many agencies put a sticker on the back of the sign noting the date that the sign was put into service. This information can be very important when determining the replacement dates for signs.
12. Post Type – Unistrut, pipe post, wooden post, etc.
13. Post Condition – Good or needs repair.
14. Number of Signs on Post
15. Sign Obstructions
16. Obstruction Picture Hyperlink
17. Sign Picture Hyperlink – NDS uses 12 MP Canon cameras which deliver excellent resolution even in direct sunlight. In most cases, even fine print on the sign can be read. Signs are hyperlinked and incorporated into the shape file. When viewing the sign through ESRI software, one can click on the hyperlink and see the sign.
18. Retroreflectivity – See the description in Task 2.3 below.
19. Notes

20. Date of Survey
21. Collection Time
22. Name of Surveyor
23. Date of Replacement

2.2 Retroreflectivity Assessment

The purpose of this task is to evaluate all traffic signs in the project areas to assess their reflectivity. The NDS team collected retroreflectivity data for all signs in the City of Lakeport, the City of Clearlake, and the unincorporated areas of the County during the daytime survey. The retroreflectometer results reveal which signs do not meet the minimum standards established by the Federal Highway Administration (FHWA). Retroreflectivity refers to the property of an object to reflect light back to the source. In the case of traffic signs, retroreflective sign sheeting is used to reflect light from vehicle headlamps back to a driver, thus increasing the sign visibility at night. Retroreflective traffic sign sheeting is created using tiny glass beads or prismatic reflectors that have been developed to reflect light.

As the older driver population increases, maintaining traffic sign retroreflectivity is increasingly more important. Therefore, the FHWA recently adopted Federal rules that require all agencies that maintain roadways open to the traveling public to adopt a sign maintenance program. This program must be designed to maintain traffic sign retroreflectivity at or above specific levels. As per the latest version of the California Manual of Uniform Traffic Control Devices (CAMUTCD) Section 2A.08 Maintaining Minimum Retroreflectivity, *"Public agencies or officials having jurisdiction shall use an assessment or management method that is designed to maintain sign retroreflectivity at or above the minimum levels in Table 2A-3"*

As per MUTCD, the following are the few assessment or management methods that should be used to maintain sign retroreflectivity:

- Visual Nighttime Inspection - The retroreflectivity of an existing sign is assessed by a trained sign inspector conducting a visual inspection from a moving vehicle during nighttime conditions. Signs that are visually identified by the inspector to have retroreflectivity below the minimum levels should be replaced.
- Measured Sign Retroreflectivity - Sign retroreflectivity is measured using a retro reflectometer. Signs with retroreflectivity below the minimum levels should be replaced.
- Expected Sign Life—When signs are installed, the installation date is labeled or recorded so that the age of a sign is known. The age of the sign is compared to the expected sign life. The expected sign life is based on the experience of sign retroreflectivity degradation in a geographic area compared to the minimum levels. Signs older than the expected life should be replaced.

Table 2A.3, identifies the minimum retroreflectivity levels for CAMUTCD-standard signs, focusing in particular on regulatory, warning, and guide signs. Signs which are below minimum levels need to be

Table 2A-3. Minimum Maintained Retroreflectivity Levels¹

Sign Color	Sheeting Type (ASTM D4956-04)				Additional Criteria
	Beaded Sheeting			Prismatic Sheeting	
	I	II	III	III, IV, VI, VII, VIII, IX, X	
White on Green	W*; G ≥ 7	W*; G ≥ 15	W*; G ≥ 25	W ≥ 250; G ≥ 25	Overhead
	W*; G ≥ 7	W ≥ 120; G ≥ 15			Post-mounted
Black on Yellow or Black on Orange	Y*; O*	Y ≥ 50; O ≥ 50			2
	Y*; O*	Y ≥ 75; O ≥ 75			3
White on Red	W ≥ 35; R ≥ 7				4
Black on White	W ≥ 50				—
¹ The minimum maintained retroreflectivity levels shown in this table are in units of cd/lx/m ² measured at an observation angle of 0.2° and an entrance angle of -4.0°.					
² For text and fine symbol signs measuring at least 48 inches and for all sizes of bold symbol signs					
³ For text and fine symbol signs measuring less than 48 inches					
⁴ Minimum sign contrast ratio ≥ 3:1 (white retroreflectivity ÷ red retroreflectivity)					
[*] This sheeting type shall not be used for this color for this application.					
Bold Symbol Signs					
<ul style="list-style-type: none"> • W1-1,2 – Turn and Curve • W1-3,4 – Reverse Turn and Curve • W1-5 – Winding Road • W1-6,7 – Large Arrow • W1-8 – Chevron • W1-10 – Intersection in Curve • W1-11 – Hairpin Curve • W1-15 – 270 Degree Loop • W2-1 – Cross Road • W2-2,3 – Side Road • W2-4,5 – T and Y Intersection • W2-6 – Circular Intersection • W2-7,8 – Double Side Roads 	<ul style="list-style-type: none"> • W3-1 – Stop Ahead • W3-2 – Yield Ahead • W3-3 – Signal Ahead • W4-1 – Merge • W4-2 – Lane Ends • W4-3 – Added Lane • W4-5 – Entering Roadway Merge • W4-6 – Entering Roadway Added Lane • W6-1,2 – Divided Highway Begins and Ends • W6-3 – Two-Way Traffic • W10-1,2,3,4,11,12 – Grade Crossing Advance Warning 	<ul style="list-style-type: none"> • W11-2 – Pedestrian Crossing • W11-3,4,16-22 – Large Animals • W11-5 – Farm Equipment • W11-6 – Snowmobile Crossing • W11-7 – Equestrian Crossing • W11-8 – Fire Station • W11-10 – Truck Crossing • W12-1 – Double Arrow • W16-5P,6P,7P – Pointing Arrow Plaques • W20-7 – Flagger • W21-1 – Worker 			
Fine Symbol Signs (symbol signs not listed as bold symbol signs)					
Special Cases					
<ul style="list-style-type: none"> • W3-1 – Stop Ahead: Red retroreflectivity ≥ 7 • W3-2 – Yield Ahead: Red retroreflectivity ≥ 7; White retroreflectivity ≥ 35 • W3-3 – Signal Ahead: Red retroreflectivity ≥ 7; Green retroreflectivity ≥ 7 • W3-5 – Speed Reduction: White retroreflectivity ≥ 50 • For non-diamond shaped signs, such as W14-3 (No Passing Zone), W4-4P (Cross Traffic Does Not Stop), or W13-1P,2,3,6,7 (Speed Advisory Plaques), use the largest sign dimension to determine the proper minimum retroreflectivity level. 					

replaced. Reflectivity data was collected with a Roadvista Model 922 Retroreflectometer. The Roadvista 922 has an integrated bar code reader allowing the user to match the reflectivity data to the sign inventory data. It is highly accurate and collects both 0.2 degrees and 0.5 degrees readings simultaneously. It also has an integrated GPS that verifies the location of the sign and ensures that the correct reflectivity data is matched to the correct sign attributes.

2.3 Traffic Sign Posts Condition

Traffic sign posts were evaluated separately from the signs themselves. In some cases, traffic signs are in acceptable condition but the posts are damaged and need to be replaced. In other cases, the signs need to be replaced but the post is in acceptable condition. Sometimes, both need replacement.

In the following chapters, the cost of recommendations have been listed for signs failing retroreflectivity, signs in poor conditions and for sign posts that need replacement, as per all three project areas. Detailed tables for each study area can be viewed in the appendix of this report.

3.0 City of Lakeport

3.1 Recommendations for the City of Lakeport

This section presents the survey results for the City of Lakeport. A total of 1,447 signs were surveyed in the City. These signs were inclusive of warning, regulatory, guide, and city specific signs. Out of these 1,447 signs, TJKM recommends-

- Replacing 405 signs that failed the retroreflectivity test. The replacement cost of these signs is \$165,000.
- Replacing 66 signs that passed the retroreflectivity test but are damaged, vandalized or faded. The replacement cost of these signs is \$16,500.
- Referencing 61 signs that do not have retroreflectivity requirements and are damaged, vandalized or faded, for future sign replacement project. The cost of replacing these signs is \$15,300.
- Replacing 15 sign posts that are leaning, bent or fallen. The replacement cost of these posts is \$3,750.

It should be noted that as per Table 2A-3 of the MUTCD retroreflectivity requirements, there are different color combinations with different requirements. Out of the 1,447 signs surveyed, 362 signs do not have MUTCD retroreflectivity requirements. These are signs such as No Parking at Any Time R26 (CA), time-restricted parking, other parking signs, few city specific signs, and object marker signs. Signs in poor conditions which do not have retroreflectivity requirements as per the MUTCD, have been inventoried for suggested future replacement.

Table 1 below presents the primary recommendations of this report for the City of Lakeport. Out of the 1,447 signs, TJKM recommends replacing a total of 532 signs and 15 sign posts at a total cost of \$200,550.

Table 1: Summary of Costs for Sign and Post Replacements in the City of Lakeport

	<i>Category</i>	<i>Number</i>	<i>Total</i>
1	Signs that failed retroreflectivity	405	\$165,000
2	Sign that have passed retroreflectivity but are damaged, faded or vandalized	66	\$16,500
3	Signs with no retroreflectivity requirement and that are damaged, faded or vandalized	61	\$15,300
4	Posts that are leaning, bent or fallen	15	\$3,750
Grand Total			\$200,550

3.2 Cost Estimate for Signs Failing Retroreflectivity

This section of the Countywide Sign Inventory Plan provides the detailed cost estimate for 405 signs that failed the retroreflectivity test in the City of Lakeport.

Regulatory Signs

Signs Recommended for Replacement

This section provides the detailed cost estimate for 108 regulatory signs needing replacement in the City of Lakeport. The cost of replacing these signs would be \$27,000.

Table 2: Regulatory Signs Failing Retroreflectivity Test in the City of Lakeport

	<i>MUTCD Code</i>	<i>Sign Detail</i>	<i>Number</i>	<i>Unit Cost</i>	<i>Total Cost</i>
1	R1-1	Stop	61	\$250	\$15,250
2	R1-3	4-Way	1	\$250	\$250
3	R1-3 MOD	2-Way	2	\$250	\$500
4	R2-1	Speed Limit Sign	4	\$250	\$1,000

Grand Total			258		\$64,500

Signs Recommended for Future Replacement

No signs in this category were recommended for future replacement.

City Specific Signs

Signs Recommended for Replacement

This section provides the detailed cost estimate for three city specific signs needing replacement in the City of Lakeport. The cost of replacing these signs is \$900.

Table 5: City Specific Signs Failing Retroreflectivity Test in the City of Lakeport

	<i>MUTCD Code</i>	<i>Sign Detail</i>	<i>Number</i>	<i>Unit Cost</i>	<i>Total Cost</i>
1	COL-23	Tribal Health Clinic County Health Dept. with Left Arrow	1	\$300	\$300
2	COL-6	United Christian Parish 3 Blocks with Left or Right Arrow	2	\$300	\$600
Grand Total			3		\$900

Signs Recommended for Future Replacement

No signs in this category were recommended for future replacement.

3.3 Cost Estimate for Signs in Poor Condition

This section of the Countywide Sign Inventory Plan provides the detailed cost estimate for 66 signs that passed the retroreflectivity test but are damaged, vandalized or faded in the City of Lakeport. Cost estimates for 61 signs that do not have retroreflectivity requirements but are damaged, vandalized or faded, and are recommended for future sign replacement project are also provided in this section.

Regulatory Signs

Signs Recommended for Replacement

This section provides the detailed cost estimate for 34 regulatory signs which are damaged, faded or vandalized and need replacement in the City of Lakeport. The cost of replacing these signs is \$8,500.

Table 6: Regulatory Signs in Poor Condition in City of Lakeport

	<i>MUTCD Code</i>	<i>Sign Detail</i>	<i>Number</i>	<i>Unit Cost</i>	<i>Total Cost</i>
1	R1-1	Stop	28	\$250	\$7,000
2	R1-2	Yield	1	\$250	\$250
3	R2-1	Speed Limit Sign	2	\$250	\$500
4	R3-1	No Right Turn	1	\$250	\$250
5	R4-11	May Use Full Lane	1	\$250	\$250
6	R5-1	Do Not Enter	1	\$250	\$250
Grand Total			34		\$8,500

Signs Recommended for Future Replacement

This section provides the detailed cost estimate for 58 regulatory signs which do not have retroreflectivity requirements but are damaged, faded or vandalized. These signs are referenced for future replacement in the City of Lakeport. The cost of replacing these signs is \$14,500.

Table 7: Regulatory Signs in Poor Condition in the City of Lakeport Referenced for Future Replacement

	<i>MUTCD Code</i>	<i>Sign Detail</i>	<i>Number</i>	<i>Unit Cost</i>	<i>Total Cost</i>
1	R26 (CA)	No Parking Any Time	23	\$250	\$5,750
2	R28 (CA)	No Parking Vehicles Over 5 Ft High w/Lt Arrow	1	\$250	\$250
3	R32 (CA) MOD	2 Hour Parking 6 AM To 6 PM Except Weekends	3	\$250	\$750

Grand Total			2		\$500

City Specific Signs

Signs Recommended for Replacement

No signs in this category were recommended for future replacement.

Signs Recommended for Future Replacement

This section provides the detailed cost estimate for one city specific sign which does not have retroreflectivity requirements but is damaged, faded or vandalized. This sign is referenced for future replacement in the City of Lakeport. The cost of replacing this sign is \$300.

Table 11: City Specific Signs in Poor Condition in the City of Lakeport Referenced for Future Replacement

	<i>MUTCD Code</i>	<i>Sign Detail</i>	<i>Number</i>	<i>Unit Cost</i>	<i>Total Cost</i>
1	COL-5	Warning Neighborhood Watch We Look Out For Each Other!	1	\$300	\$300
Grand Total			1		\$300

3.4 Cost Estimate for Posts in Poor Condition

This section provides the detailed cost estimate for 15 sign posts which are leaning, bent or fallen in the City of Lakeport. The cost of replacing these posts is \$3,750.

Table 12: Sign Posts in Poor Condition in City of Lakeport

	<i>Post Type</i>	<i>Number</i>	<i>Unit Cost</i>	<i>Total</i>
1	Pipe Post (round)	15	\$250	\$3,750
Grand Total		8		\$3,750

4.0 City of Clearlake

4.1 Recommendations for the City of Clearlake

This section presents the survey results for the City of Clearlake. A total of 2,369 signs were surveyed in the City. These signs were inclusive of warning, regulatory, guide, and city specific signs. Out of these 2,369 signs, TJKM recommends-

- Replacing 294 signs that failed retroreflectivity test. The replacement cost of these signs is \$73,650.
- Replacing 113 signs that passed retroreflectivity test but are damaged, vandalized or faded. The replacement cost of these signs is \$28,400.
- Referencing 157 signs that do not have retroreflectivity requirements and are damaged, vandalized or faded, for future sign replacement project. The cost of replacing these signs is \$40,100.
- Replacing 21 sign posts that are leaning, bent or fallen. The replacement cost of these posts is \$5,250.

It should be noted that as per Table 2A-3 of the MUTCD retroreflectivity requirements, there are different color combinations with different requirements. Out of the 2,369 signs surveyed, 1,373 signs do not have MUTCD retroreflectivity requirements. These are signs such as No Parking at Any Time R26 (CA), time-restricted parking, other parking signs, few city specific signs, and object marker signs. Signs in poor conditions which do not have retroreflectivity requirements as per the MUTCD, have been inventoried for suggested future replacement.

Table 13 below presents the primary recommendations of this report for the City of Clearlake. Out of the 2,369 signs, TJKM recommends replacing 564 signs and 21 sign posts at a total cost of \$147,250.

Table 13: Summary of Costs for Sign and Post Replacements in the City of Clearlake

	<i>Category</i>	<i>Number</i>	<i>Total</i>
1	Signs that failed retroreflectivity	294	\$73,650
2	Sign that have passed retroreflectivity but are damaged, faded or vandalized	113	\$28,400
3	Signs with no retroreflectivity requirement and that are damaged, faded or vandalized	157	\$40,100
4	Posts that are leaning, bent or fallen	21	\$5,250
Grand Total			\$147,400

4.2 Cost Estimate for Signs Failing Retroreflectivity

This section of the Countywide Sign Inventory Plan provides the detailed cost estimate for 294 signs that failed the retroreflectivity test in the City of Clearlake.

Regulatory Signs

Signs Recommended for Replacement

This section provides the detailed cost estimate for 149 regulatory signs needing replacement in the City of Clearlake. The cost of replacing these signs is \$37,250.

Table 14: Regulatory Signs Failing Retroreflectivity Test in the City of Clearlake

	<i>MUTCD Code</i>	<i>Sign Detail</i>	<i>Number</i>	<i>Unit Cost</i>	<i>Total Cost</i>
1	R1-1	Stop	73	\$250	\$18,250

5.0 Unincorporated Lake County

5.1 Recommendations for Unincorporated Lake County

This section presents the survey results for unincorporated Lake County. A total of 6,589 signs were surveyed in the County. These signs were inclusive of warning, regulatory, guide, and county specific signs. Out of these 6,589 signs, TJKM recommends-

- Replacing 741 signs that failed retroreflectivity test. The replacement cost of these signs is \$185,850.
- Replacing 242 signs that passed retroreflectivity test but are damaged, vandalized or faded. The replacement cost of these signs is \$60,800.
- Referencing 60 signs that do not have retroreflectivity requirements and are damaged, vandalized or faded, for future sign replacement project. The cost of replacing these signs is \$16,250.
- Replacing 16 sign posts that are leaning, bent or fallen. The replacement cost of these posts is \$4,000.

It should be noted that as per Table 2A-3 of the MUTCD retroreflectivity requirements, there are different color combinations with different requirements. Out of the 6,589 signs surveyed, 397 signs do not have MUTCD retroreflectivity requirements. These are signs such as No Parking at Any Time R26 (CA), time-restricted parking, other parking signs, few county specific signs, and object marker signs. Signs in poor conditions which do not have retroreflectivity requirements as per the MUTCD, have been inventoried for suggested future replacement.

.**Table 26** below presents the primary recommendations of this report for unincorporated Lake County. Out of the 6,589 signs, TJKM recommends replacing 1,043 signs and 16 sign posts at a total cost of \$266,900.

Table 26: Summary of Costs for Sign and Post Replacements in Unincorporated Lake County

	<i>Category</i>	<i>Number</i>	<i>Total</i>
1	Signs that failed retroreflectivity	741	\$185,850
2	Sign that have passed retroreflectivity but are damaged, faded or vandalized	242	\$60,800
3	Signs with no retroreflectivity requirement and that are damaged, faded or vandalized	60	\$16,250
4	Posts that are leaning, bent or fallen	16	\$4,000
Grand Total			\$266,900

5.2 Cost Estimate for Signs Failing Retroreflectivity

This section of the Countywide Sign Inventory Plan provides the detailed cost estimate for 741 signs that failed the retroreflectivity test in unincorporated Lake County.

Regulatory Signs

Signs Recommended for Replacement

This section provides the detailed cost estimate for 294 regulatory signs needing replacement in unincorporated Lake County. The cost of replacing these signs is \$73,500.
